

## Deliverables:

The report you produce must include the following deliverables:

- A description of the data source used.

Some of the columns included in the dataset are listed below:

School ID: Unique identification number for each school.

School Name: The name of the school.

Location: The information on district, street, and union councils Enrollment: The total number of students enrolled in the school.

Teachers: The number of teachers in the school School Upgradation Years: The years in which the school levels were upgraded (in datasets cols are upgrade\_primary\_year, upgrade\_middle\_year, upgrade\_high\_year, upgrade\_higher\_sec\_year)

School Gender: The gender for which the school was initially built. Gender Studying: The genders currently studying in the school School Head Information, School status, School medium, Year of establishment, Genders studying, Infrastructure.

- **Documentation of any cleaning or manipulation of data.**

- *As per the given overview the dataset, school ID's given are the actual schools along with their name. but there are 48,120 schools that are functional and 1 school is non-functional. So according to this 70 schools are there whose status is not clear. If I say that those are the proposed schools but nothing has been done anything about them so far.*  
*We can remove those schools from our dataset and can just spend all the funds in improving the buildings and all.*
- *We can also spend some funds on making buildings of those proposed schools if we have that much amount.*
- *There are 18 schools whose "Construct Type" is "Completely Rough", which needs to be inspected for children's safety.*
- *There are 129 schools which are "running in the Mosque", they need a proper building.*
- *705 schools don't have functional classrooms.*
- *There are 280 buildings whose status is 0 means these needs to be renovated.*

- **Justification for the allocation of funds to specific educational initiatives.**

*(School ID 54934) A school in liaqatpur has a non functional building with poor condition and construction quality is dangerous. That should be demolished and built from scratch.*

## The following tasks will be useful in helping you navigate and using the dataset as needed:

- **Determine the total number of schools present in the dataset.**

There are **48,191** schools, but total functional schools are **48, 120** and 1 school is non-functional.

Rest of 70 schools have no record at all except school id, emiscode, and location. There aren't any teachers, herads or students in those schools.

- **Identify the lowest students of school\_Gender(male & female) by school level of schools established in the 2000s**

The H. Secondary has the lowest number of students.

- **Determine the top 5 districts with the highest number of teachers and non-teachers in schools.**

Row Labels	Sum of Teachers	Sum of NonTeachers
FAISALABAD	22996	4918
LAHORE	16654	3128
RAHIMYAR KHAN	17601	3006
RAWALPINDI	17112	3438
SARGODHA	15798	3418
<b>Grand Total</b>	<b>90161</b>	<b>17908</b>

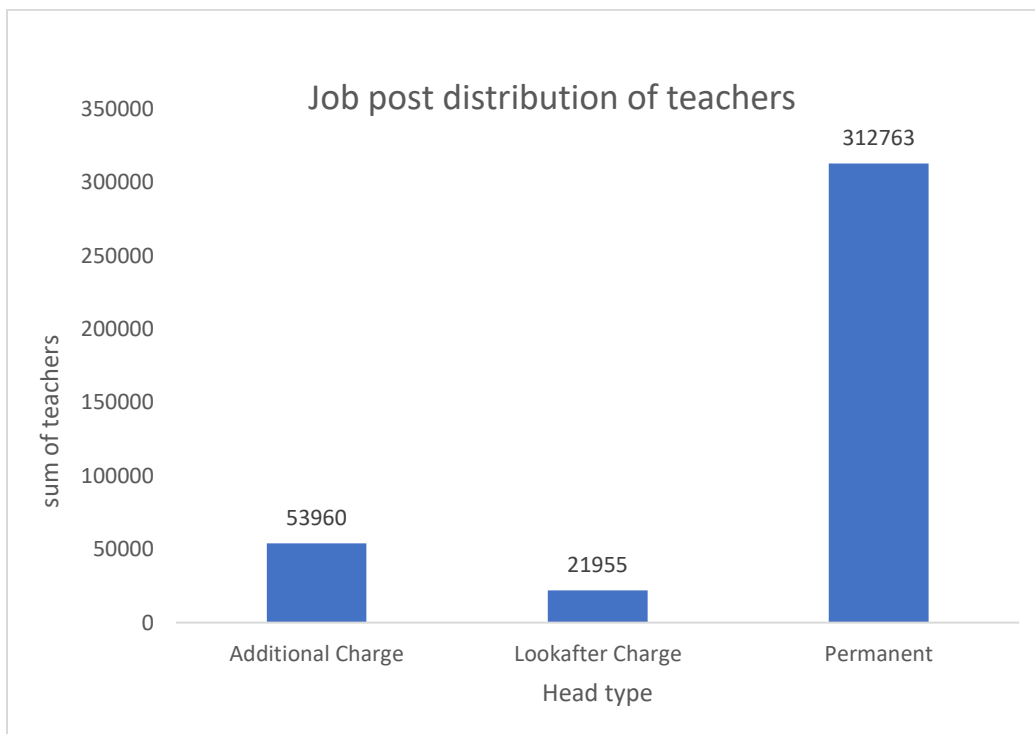

- Explore the school level and medium that have the lowest number of functional classrooms.

Row Labels	Sum of functional_classrooms
H.Sec.	15396
Middle	61192
Primary	102125
Secondary	83398
sMosque	512
(blank)	
<b>Grand Total</b>	<b>262623</b>

#### Conclusion:

- Maximum number of functional class rooms are in Primary level
- It covers 39% of the total classrooms
- **Create a bar chart showcasing the distribution of teachers across different schools.**

#### Conclusion:

- Out of functional schools, there are different number of teachers allocated to different schools.
- Two school have more than 100 teachers but that justifies the school strength.

- The schools that are using **Mosque buildings** need to hire more teachers.

● **Calculate the number of male and female students (School\_Gender)**

Row Labels	Count of school_gender
Female	25229
Male	22891
<b>Grand Total</b>	<b>48120</b>

Conclusion:

There is an equal amount of Male and Female students.

● **Count the number of schools in rural and urban areas and calculate the percentage**

of schools offering Urdu and English medium education or both in each category.

**Count of number of schools in rural and urban areas by dragging a unique identifier ie school ID.**

Row Labels	Both	English	Urdu	Grand Total
Rural	7596	4264	30489	42349
Urban	1808	1214	2749	5771
<b>Grand Total</b>	<b>9404</b>	<b>5478</b>	<b>33238</b>	<b>48120</b>

**Percentage of number of schools in rural and urban areas by dragging a unique identifier ie school ID.**

Row Labels	Both	English	Urdu	Grand Total
Rural	17.94%	10.07%	71.99%	100.00%
Urban	31.33%	21.04%	47.63%	100.00%
<b>Grand Total</b>	<b>19.54%</b>	<b>11.38%</b>	<b>69.07%</b>	<b>100.00%</b>

Conclusion:

- In rural areas, **72%** school are Urdu medium where are urban areas have **48%** Urdu medium schools.
- Therefore, we need to change the mediums to produce competent generation.
- Identify the district with the highest enrollment in primary schools since their establishment.

Row Labels	Sum of enrollment
VEHARI	132077
T.T.SINGH	115485
SIALKOT	134986
SHEIKHUPURA	98575

BAHAWALNAGAR	22815

ATTOCK	17879
<b>Grand Total</b>	<b>870005</b>

Conclusion:

- highest number of enrollments in **higher school** is in district **Faisalabad**

- Create a bar chart displaying the distribution of schools according to school\_level

Row Labels	Count of school_id
H.Sec.	749
Middle	8277
Primary	31994
Secondary	6667
sMosque	433
<b>Grand Total</b>	<b>48120</b>

Conclusion:

Distribution of schools is **1.56%** for H.Sec, **17.20%** for middle, **66.49%** for primary, **13.85%** for secondary.

- Generate a bar chart representing the number of students categorized by gender (School\_Gender).

Row Labels	Count of school_id
Female	52.43%
Male	47.57%
<b>Grand Total</b>	<b>100.00%</b>

- Create a table showcasing the school\_ownership with respect to schools.

Row Labels	Count of school_id
Building Provided By Local Residents	1028
Education Department	45607
Municipal Building	537
On Rent	183
Property Of Any Other Institution Besides The Municipal Institution	132
Running In The Mosque	128
School Council provided building	83
Some Other Govt. School	148
(blank)	274
<b>Grand Total</b>	<b>48120</b>

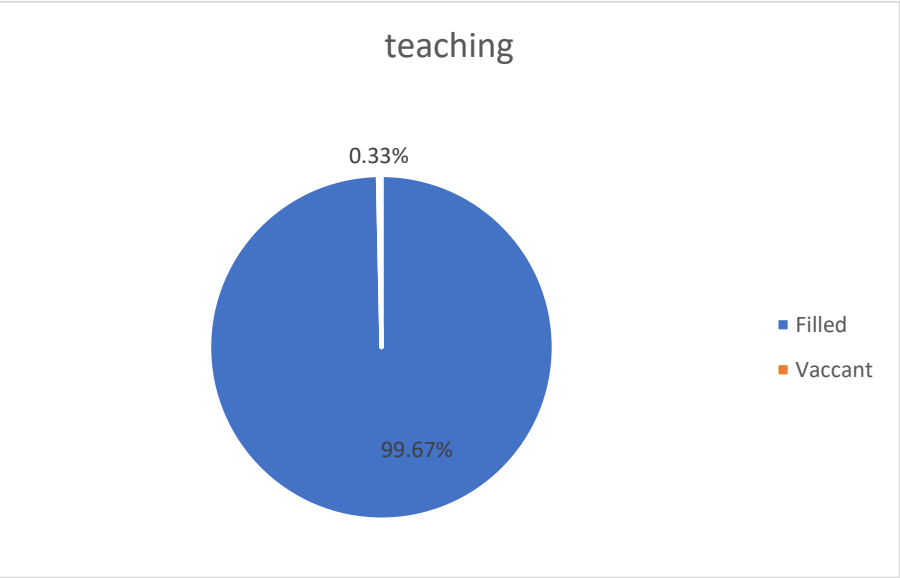

- Visualize the distribution of teachers based on their respective job posts using a bar chart.

No enough data is given about teachers’ job posts, instead, if it was heads posts, it would be like this:

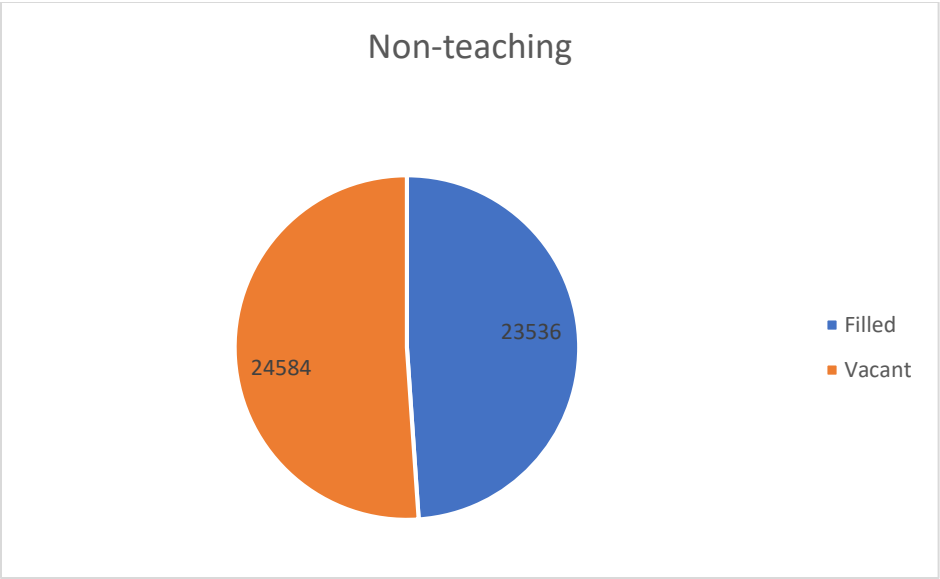

Row Labels	Count of school_id
Additional Charge	5752
Lookafter Charge	2223
NULL	198
Permanent	39947
Grand Total	48120

- Create a pie chart to show the percentage of vacant and filled teaching and non-teaching posts.

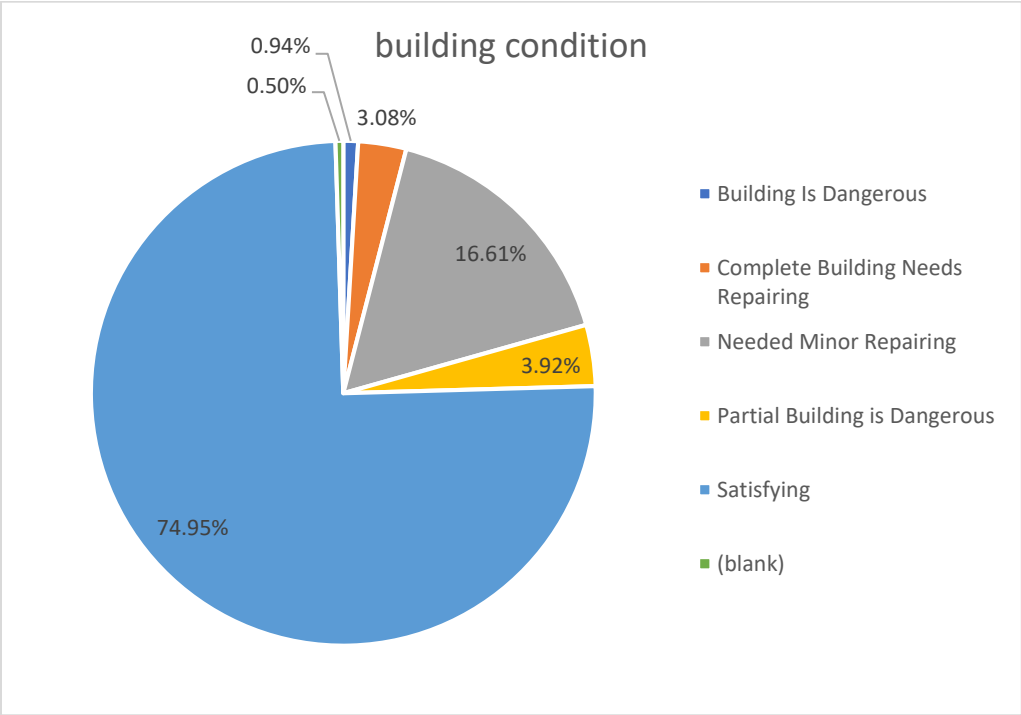

Row Labels	Count of Adjusted teachers
Filled	47961
Vaccant	159
Grand Total	48120

Row Labels	Count of Adjusted Non teachers
Filled	23536
Vacant	24584
Grand Total	48120

- Determine the percentage of schools with satisfactory building conditions (bldg\_condition).

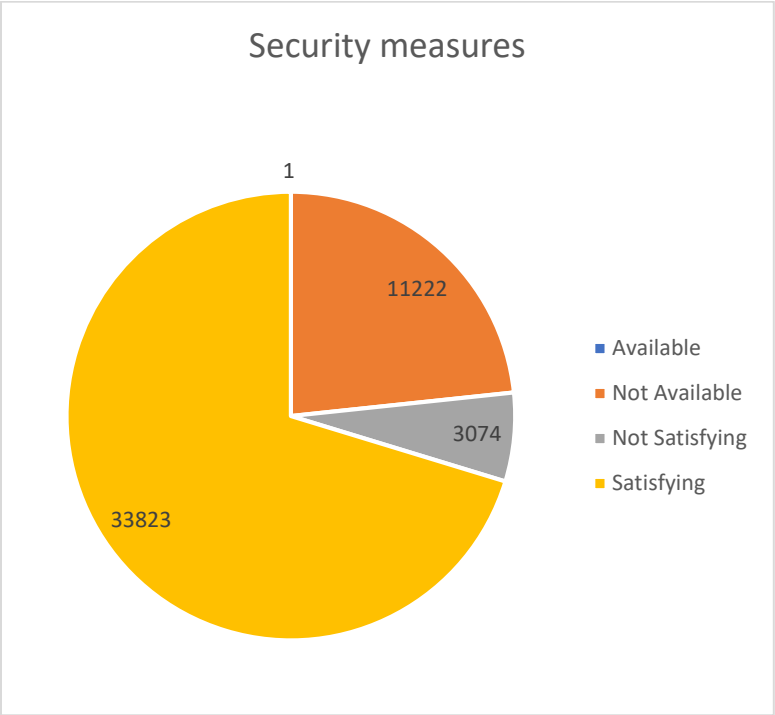

Conclusion:

- 74% of the schools are with satisfactory building conditions.
- Calculate the number of schools with satisfactory security measures.

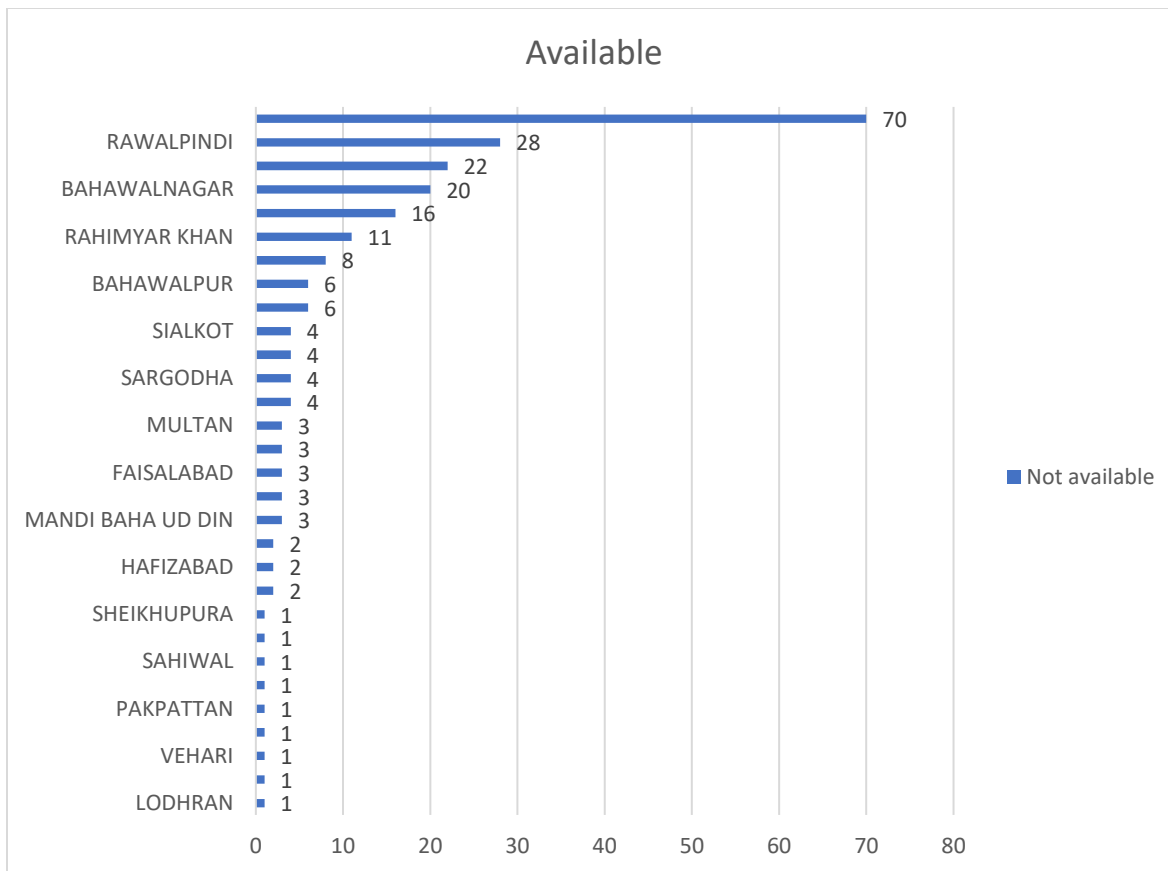

Row Labels	Count of school_id
Available	1
Not Available	11222

Not Satisfying	3074
Satisfying	33823
Grand Total	48120

Conclusion:

- 70% of schools have satisfying security.
- List the names of the 5 districts with the lowest availability of drinking water facilities in schools.

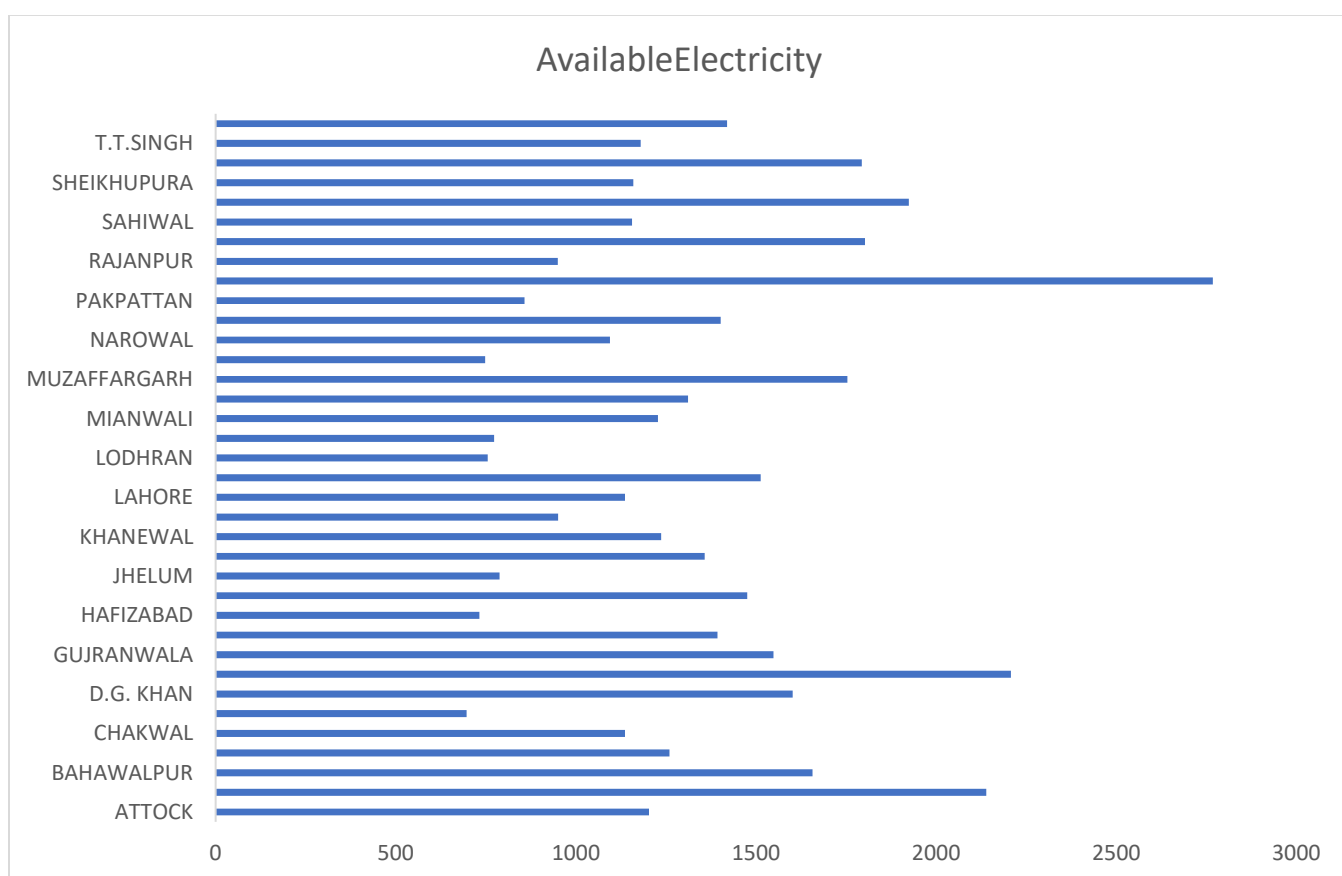

#### Conclusion:

- LODHRAN
- NAROWAL
- VEHARI
- T.T.SINGH
- PAKPATTAN
- KHUSHAB
- SAHIWAL
- JHANG
- SHEIKHUPURA
- Are the districts with lowest drinking water facilities.

#### ● Identify the names of the 5 districts with the lowest availability of electricity in schools.

NANKANA SAHIB	748
MUZAFFARGARH	1754
MULTAN	1312
MIANWALI	1228
MANDI BAHU UD DIN	773
LODHRAN	755
LAYYAH	1513
LAHORE	1137

KHUSHAB	951
KHANEWAL	1237
KASUR	1358
JHELUM	788
JHANG	1476
HAFIZABAD	732
GUJRAT	1393
GUJRANWALA	1549
FAISALABAD	2208
D.G. KHAN	1602
CHINIOT	697

#### Conclusion:

Chiniot, Hafizabad, Lodhran, Mandi Bahud Din, Nankhana Sahib are the districts with lowest electricity availability.

- Determine the names of the 5 districts with the lowest presence of boundary walls in schools.

NANKANA SAHIB	748
MANDI BAHU UD DIN	773
LODHRAN	755

JHELUM	788
HAFIZABAD	732
CHINIOT	697

Conclusion:

- Above are the districts with lowest presence of boundary walls.
- List the names of the 5 districts with the lowest availability of toilets in schools.

Conclusion:

- Chiniot is the one with lowest presence of toilets in the schools

These objectives will guide your analysis and provide insights for your report. You are expected to export tables from Excel for a more comprehensive report. Additionally, feel free to explore the dataset further and present any other findings that you deem relevant for educational policymaking.
